

QX-Series LCD Display 24" | 28" | 32" | 43" | 55"

The QX-Series multi-screen capable UHD displays are designed for demanding surveillance and digital signage applications. Multi-screen viewer enables simultaneous display of multiple signals with up to 4 split screens. In addition to simplifying hardware setup by enabling the use of one display in place of four 1080p monitors, the QX-Series provides the gain in clarity required for real-time and up-close monitoring in traffic management centres, casinos, emergency operations centres and other public installations.

^{*} Stands are included with 24" and 28" models only.

Easy Control and Integration

Its built-in LAN and RS232 control capabilities make the QX-Series easy to control and integration a breeze. Whether it is a local serial management connection or a remote network installation, the QX-Series can be managed in multiple scenarios and applications.

Multi-screen viewier allows all 4 signal sources being displayed in 4 screens simultaneously.

Industry-leading Reliability

Designed for 24/7 operation, these durable metal-housed displays protected with NeoVTM Optical Glass take advantage of superior components to ensure a long product lifetime. Its integrated HeatControl Sensors* automatically activate the internal cooling fans, which is crucial when the temperature rises in mission-critical installations.

Features

- 4K UHD 3840 x 2160 resolution
- NeoVTM Optical Glass protects the screen from scratches and other damages
- Durable metal housing
- $\bullet \ Multi-screen\ Viewer\ under\ PiP/PbP\ function\ allows\ displaying\ up\ to\ four\ split\ screens\ from\ four\ individual\ input\ sources.$
- Image Enhancer: Deinterlace / Noise Reduction
- \bullet RS232/IR control support provides compatiblity with control systems
- EcoSmart Sensor automatically adjusts brightness level according to ambient lighting conditions.
- \bullet HeatControl Sensors automatically activate the internal cooling fans when temperature rises (32", 43" and 55" only)

Experience the 4K Difference

Don't miss a single detail with this powerful 4K display. View smooth 4K video and graphics with a new level of detail and clarity. Offering 8.3 million pixels, the QX-Series provides sufficient resolution for even the most demanding surveillance and digital signage applications.

Multi-screen Viewer; One display, Four screens

Beyond traditional two-input Picture-by-Picture (PIP) feature, the QX-Series' multi-screen viewer can display up to four full HD screens simultaneously from four different input sources. This advanced feature allows it to replace a typical four monitor setup and delivers four-quadrant viewing at crisp and true Full HD content.

PID Command & Ctrl Software

PID Command & Ctrl is a software that allows users to control AG Neovo displays via LAN or RS232 connections. It provides a simple and intuitive interface for remote management, OSD-related settings, and easy control on deployed displays. It also can be used to create video walls within minutes and assist system integrators with setting up displays.

- Flicker-free display technology reduces eye discomfort (24" and 28" only)
- Blue-light filter technology reduces eye discomfort
- Black-level adjustment for presenting more details in dark images
- Selectable gamma curves optimise different kinds of images
- Built-in speakers
- Premium-grade panel for high reliability and long product lifetime
- Height adjustable stand allows users to tilt, pivot and swivel (24" and 28" only)
- * Features may vary by model
